

## Liqui-Sorb®

Liqui-Sorb® is a moisture absorbing blanket developed by NNZ used to cover potatoes, vegetables and fruit products in order to absorb condensation when they are being transported in non-insulated containers or lorries. This innovative concept, which won NNZ the Tectextil Innovationspreis (Textile tech prize), is now prescribed by an increasing number of buyers, particularly

for transportation to warmer countries. Using Liqui-Sorb® blankets during the transportation of potatoes, vegetables and fruit products ensures they arrive at their destinations in a much better condition and diseases, such as silver scab in seed potatoes, get very little chance of developing. Liqui-Sorb® can be supplied as single blankets or as a blanket roll.

## Liqui-Sorb®

### Single blankets

<b>Material</b>	Non-woven polypropylene fabric with absorber approved for the foodstuffs industry.
<b>Quality</b>	Absorption capacity 30 litres per blanket.
<b>Type</b>	Size 1.1 x 3 metres, suitable for covering two pallets with product. 28 blankets per box, in two packs each containing 14 blankets, packed in polyethylene, sufficient for covering four 20ft containers.

### Blanket roll

<b>Material</b>	Non-woven polypropylene fabric with absorber approved for the foodstuffs industry.
<b>Quality</b>	Absorption capacity 200 litres per roll.
<b>Type</b>	Size 2.25 x 12.5 metres, suitable for covering a 40ft container. Packed in a polyethylene sack.

**Winner of the Techtexsil prize 2003.**

NNZ is a leading organisation in the world of innovative packaging for the agricultural sector. The company undertakes intensive market and product research and continually anticipates market developments. In doing so, NNZ has earned a central position at international level within the world of packaging.
