

## Ökopack®-Tray

For all those who care about nature and our environment NNZ offers a sustainable line of packaging products under the name Ökopack®. Ökopack®-Tray is a packaging tray made of 'annually renewable materials' such as starch from potatoes, maize and corn. These raw materials – originating, as they do, from plants that can be grown and harvested at least annually - are highly sustainable and practically inexhaustible.

Therefore they offer a real ecologically justifiable alternative to fossil based raw materials. During their growth, plants withdraw CO<sub>2</sub> from the atmosphere. Thus, Ökopack packaging materials help to reduce the greenhouse effect. After use, the materials may be composted in accordance with the CEN 13432 norm. Ökopack®-Tray is available in various different versions for a variety of different products

## Ökopack®-Tray

### Ökopack®-Tray C

**Material** Transparent tray made from biodegradable raw material based on sugar, CEN 13432 certified.

**Colours** Transparent high gloss, black.

**Printing** Embossing possible.

**Properties** High gloss, high transparency (PET-like)

**Type** Various sizes and types, adapted to the product to be packed and/or the packaging machines.

### Ökopack®-Tray P

**Material** Fibre based tray made from biomass, biodegradable raw material, CEN 13432 certified.

**Colours** Natural colour, green, brown, red, yellow, etc.

**Printing** Embossing or printing on tray possible.

**Properties** Fibrous like tray, home compostable.

**Type** Various sizes and types, adapted to the product to be packed and/or the packaging machines.

### Ökopack®-Tray W

**Material** Water soluble tray made from biodegradable raw material based on starch, CEN 13432 certified.

**Colours** Transparent, coloured in yellow (gold), purple.

**Printing** Embossing possible.

**Properties** Quickly water soluble, special applications e.g. flower bulb trays.

**Type** Various sizes and types, adapted to the product to be packed and/or the packaging machine.

## Ökopack®-Tray

### Ökopack®-Tray FF

**Material** Soft foam tray made from biodegradable raw material based on starch, CEN 13432 certified.

**Colours** Green, black.

**Printing** Embossing possible.

**Properties** Foam material, especially good for food protection (Foamed PS-like)

**Type** Various sizes and types, adapted to the product to be packed and/or the packaging machine.

### Ökopack®-Tray FS

**Material** Stiff foam tray made from biodegradable raw material based on sugar, CEN 13432 certified.

**Colours** White.

**Printing** Embossing possible.

**Properties** Foam material (Foamed EPS-like)  
Topsealing possible with Ökopack-Film C.

**Type** Various sizes and types, adapted to the product to be packed and/or the packaging machine.

NNZ is a leading organisation in the world of innovative packaging for the agricultural sector. The company undertakes intensive market and product research and continually anticipates market developments. In doing so, NNZ has earned a central position at international level within the world of packaging.
