

Top-Guard®

When loading and unloading pallets with seed potatoes, occasionally a sack can fall off the pallet. To solve this problem, NNZ has developed Top-Guard®, a stretch-sleeve of unbleached cotton which can firmly hold in place, the top layer of a pallet of typically 50 kg sacks of seed potatoes.

A Top-Guard® stretch-sleeve easily can be applied by one person. The strong elastic sleeve ensures that sacks will no longer fall off the pallet during their transport and transfer. At arrival at the destination, the stretch-sleeve can be easily removed and does not cause a burden for the environment.

Top-Guard®

Material Unbleached cotton fabric.

Supplied Standard pallet size 120 x 160 cm.
Other sizes on request.

NNZ is a leading organisation in the world of innovative packaging for the agricultural sector. The company undertakes intensive market and product research and continually anticipates market developments. In doing so, NNZ has earned a central position at international level within the world of packaging.
