

Trays

Fresh is a question of time. This is why NNZ supplies a large range of trays from stock. All the large number of different types which are in common use for the various fresh products are available and if the customer requests it NNZ will develop a new type. The range includes trays made from pulp, cardboard and

plastics such as PP, PET, OPS and EPS. These can be printed, depending on the model and the material used. An important aspect is the constant quality of product that NNZ can supply through its widespread network. This guarantees problem-free working on the various types of packaging machines.
